<p align="center">Title: SERVICE RULES AND REGULATIONS Part 8 – Distributed Generation and Obtaining Interconnection Applicable to All Service Areas</p>	<p align="center">Approved: April 25, 2017 Effective: January 1, 2018</p>	

340. Applicability.

Sections 340-345 of this tariff apply to the interconnection of all qualifying power generating installations having a nameplate rating or design capacity of less than 1,000 kilowatts as well as to electric utility service to such generating installations. If any part of these sections shall be in conflict with any other provision of this tariff, these sections shall control.

For interconnection of all power generating facilities, the Member and Cooperative may agree to additional or different terms, conditions, or rates for the sale or purchase of electricity.

341. Obtaining Interconnection.

Any person owning or operating a qualifying power generating installation (hereafter “Producer”) and desiring to interconnect with the Cooperative’s system shall:

341.1 Comply with Tariff.

Fully execute and fulfill the requirements found in the Agreement for Interconnection and Operation of Distributed Generation (as may be amended from time to time), provide an easement satisfactory to the Cooperative, and otherwise comply with the tariff of the Cooperative.

341.2 Comply with Laws.

Comply with applicable federal, state, and local laws, ordinances and regulations applicable to power generating installations.

341.3 Eliminate Conditions Preventing Interconnection.

In the event that it comes to the attention of the Cooperative that there are conditions preventing safe interconnection and proper parallel operation, Cooperative shall notify Producer and Producer shall not interconnect and/or initiate parallel operation until such conditions are corrected and Producer has provided at least ten (10) days written notice to the Cooperative of such correction.

The foregoing are conditions precedent to any obligation of the Cooperative to interconnect or provide any form of electric utility service.
